Design & UI/UX: Figma, Adobe XD, Canva, three.js (3D Web Development)

Tools: JIRA, GitHub, Excel, Workfront

EXPERIENCE

Tech Lead / Technical SME (Delivery & Automation)

Accenture

Aug 2024 - Present

- Act as technical SME supporting delivery and deployment of multiple web initiatives under tight timelines.
- Partner with project managers and engineers to resolve delivery risks and unblock execution issues.
- Mentor team members on development workflows, deployments, and quality standards.
- Contribute to automation and process improvement initiatives to reduce manual effort.

Technical Delivery Lead (Frontend & Platform Modernization)

Godrej Infotech

June 2023 - June 2024

- Owned end-to-end technical delivery of a large-scale website revamp, aligning UX, branding, and engineering across stakeholders.
- Led migration from legacy PHP/Bootstrap to a Next.js-based modern frontend architecture, improving scalability and maintainability.
- Delivered a functional MVP within 2 weeks, securing early buy-in from VP / Global Business Head.
- Coordinated a 7-member cross-functional team including design, content, backend, and external database teams.
- Introduced GSAP, Three.js, and Spline for animation-rich experiences while managing performance trade-offs.
- Established GitHub workflows, Kanban-based milestone tracking, and structured handover for long-term maintainability.
- Achieved beta-ready platform within 6 months, successfully rolling out updated brand identity and UX vision.

Full Stack Developer - React.js

Webstream Communications

Nov 2020 - Mar 2023

- Built web portals for pharmaceutical clients using React.js, Firebase, Bootstrap, and MySQL.
- Delivered internal tools and client-facing platforms with a focus on UI performance and usability.
- Specialized in 3D perspective rendered live-event streaming websites.

Full Stack Developer - PHP

Viztar Infotech

Nov 2019 - Sept 2020

- Developed a niche social media platform with features including posts, likes, follows, messaging, and token-based systems.
- Implemented UI and APIs using PHP, Firebase authentication, and MySQL.

Web Developer - UI UX

Accenture

Jan 2019 - Nov 2019

- Identified repetitive manual QA validation processes and automated them via custom browser extensions
- Reduced validation effort by ~85%, cutting per-page checks from ~15 minutes to under 2 minutes
- Implemented JSON-driven rules and Regex-based parsing, enabling structured CSV exports for reporting
- Received 3× Operation Excellence Awards for automation and process innovation

Web Developer - Frontend

LionBridge Technologies

Feb 2018 - Jan 2019

- Maintained multilingual websites and built Regex-based patterns for content validation and localization workflows.

PROJECT HIGHLIGHT

Godrej Infotech Website Revamp

- Led technical delivery from architecture decisions to deployment
- Managed stakeholder expectations, phased rollouts, and cross-team dependencies
- Delivered a modern, scalable platform aligned with enterprise branding standards
